PROFESSIONAL PROFILE

Business analytics and operations professional combining two years of end-to-end industrial supply-chain responsibility with a proven UK retail sales record. Earned two promotions at Ibrahim Fibres and eight consecutive Currys Top Squad selections. Uses Python, R, SQL, Power BI and Excel to forecast demand, optimise capacity, improve customer decisions and convert complex operational evidence into clear action. Expected MSc classification: Distinction.

CORE SKILLS

Analytics: Python, R, SQL, Power BI, DAX, Power Query, Tableau, Excel, KNIME | forecasting, machine learning, regression, classification, optimisation, clustering, RFM, conjoint, text analytics

Operations & commercial: Oracle ERP, procurement, imports, letters of credit, customs, logistics, supplier and lead-time performance, consultative sales, customer experience, stakeholder management

EDUCATION

Queen's University Belfast, United Kingdom

Sep 2025 - Sep 2026

MSc Business Analytics | Dissertation submitted | Expected classification: Distinction

- Forecasting and machine learning: built a 30-series retail demand-forecasting and Power BI governance system, evaluating 10,080 out-of-sample forecasts at 0.6528 RMSSE and 8.46% WAPE; also modelled airline recommendation, scientific novelty and citations, collaboration-network performance and Austin house prices.
- Decision and operations analytics: optimised a 26-week healthcare room plan, evaluated ophthalmology capacity-allocation strategies and modelled customer subscription propensity with leakage-aware logistic regression.
- Data, customer and people analytics: created an insurance Customer 360 in SQL/R; analysed employee attrition in KNIME/Tableau; combined RFM, clustering, conjoint analysis and PCA for retail product strategy.

Lahore School of Economics, Pakistan

Aug 2019 - Jul 2023

BSc (Hons) Business Administration

CERTIFICATIONS

- Microsoft Certified: Power BI Data Analyst Associate (PL-300), planned professional development.
- ASQ Certified Six Sigma Yellow Belt (CSSYB), planned professional development.

PROFESSIONAL EXPERIENCE

Currys, United Kingdom

Nov 2025 - Present

Sales Colleague

- Selected for Top Squad across eight consecutive performance periods; maintained a Care & Repair strike rate above 70% and an 80% customer feedback score.
- Earned repeated store recognition across sales, services, protection, broadband, credit and campaign KPIs by diagnosing customer needs and building relevant product, support and aftercare solutions.
- Train new colleagues in customer discovery, solution selling and store procedures, helping them build confidence while maintaining service and compliance standards.

Ibrahim Fibres Limited, Pakistan

Aug 2023 - Sep 2025

Senior Supply Chain Officer | Promoted twice

- Progressed from Management Trainee Officer to Supply Chain Officer and Senior Supply Chain Officer within two years, supporting global and local supply chains for machinery, spare parts, PTA, MEG, sub-raw materials and coal.
- Managed Oracle procure-to-receipt workflows; coordinated letters of credit, Goods Declarations, customs duties, airport/seaport clearances, shipment tracking and inland transport.
- Coordinated approximately 60 international and local shipments in peak months across suppliers, freight partners, customs agents, finance, transporters and manufacturing stakeholders.
- Worked across procurement, finance, warehousing, customs, transport and production teams to resolve documentation, clearance and delivery exceptions and protect material availability.
- Maintained a daily Excel dashboard for shipment status, lead time, delivery and supplier performance, enabling priority setting and early escalation of delays.
- Supported procurement for a Switzerland-based group entity, trained interns and used plant visits to connect purchasing decisions with production requirements.

CLIENT PROJECTS AND LEADERSHIP

- Initiated and led a live-client analytics project for Craigavon TV, integrating 28,115 job records with 35,994 appointments, completing 59 of 60 data-quality checks and shaping a dashboard for operational planning.
- Winner, QBS Data for Good Hackathon 2026: coordinated a six-member team across current-state and predictive analysis workstreams and combined the findings into one recommendation on GP practice pressure in Northern Ireland.
- Project Manager, Splash community impact project: coordinated a volunteer construction team, allocated work, monitored progress and supported safe delivery for a community organisation.
- EY Challenge: worked in a four-person team to structure a business dataset, identify the decision-relevant evidence, develop recommendations and present the analysis and conclusions to EY professionals.
- Earlier experience: produced approximately 40 articles per month at PNC Solutions and completed marketing and HR roles with Saffron Pharmaceuticals and Fotisto.
