PROFESSIONAL PROFILE

MSc Business Analytics graduate with two years of manufacturing supply-chain experience and a strong customer-facing sales record. Uses Python, SQL, Power BI, R and Excel to turn operational questions into analysis, dashboards and practical recommendations. Progressed twice at Ibrahim Fibres while coordinating Oracle purchasing, imports, customs, logistics and IT, then finished the Currys fiscal year ranked first for sales in both store and region. Seeking data, BI and technology-enabled analyst roles where operational knowledge and clear stakeholder communication matter.

CORE SKILLS

Data and BI: Power BI, DAX, Power Query, SQL, Python (pandas, scikit-learn, LightGBM), R, Excel, data modelling, ETL, data cleaning, forecasting and visualisation
Analysis and communication: business question definition, data-quality checks, process analysis, stakeholder communication, client presentations, technical documentation and practical recommendations
Enterprise and delivery: Oracle ERP, cross-functional coordination, procurement and logistics workflows, commercial KPIs, AI use cases and Git

EDUCATION

Queen's University Belfast, United Kingdom | *MSc Business Analytics* **Sep 2025 - Sep 2026**
Dissertation submitted. Taught-module average at Distinction level; final classification pending.
Lahore School of Economics, Pakistan | *BSc (Hons) Business Administration* **Aug 2019 - Jul 2023**

SELECTED ANALYTICS PROJECTS

- **Explainable Retail Demand Forecasting**: Used the public M5 Forecasting - Accuracy Walmart item-sales dataset to build 30 category-store series. Compared LightGBM, Holt-Winters and seasonal naive over four ordered 28-day backtests, producing 3,360 forecast points per model (10,080 total). LightGBM achieved 0.6528 RMSSE, 26.4% below seasonal naive and 10.6% below Holt-Winters; built a five-page Power BI dashboard for performance comparison and exception review.
- **Craigavon TV Live-Client Analytics**: Initiated and led a project linking 28,115 jobs with 35,994 appointments. Worked with the client mentor to define reporting needs, documented 60 data-quality checks (59 passed at the latest review), and designed the Power BI model for workload, appointment and backlog analysis.
- **Insurance Customer 360**: Used SQL and R to integrate 4,085 customer records across four related tables and produced product-ownership and channel-preference views for cross-sell analysis.
- **QBS Data for Good Hackathon**: Winner from 12 teams; led six people analysing 312 Northern Ireland GP practices and combined demand, clinical burden, deprivation and outcomes into one prioritised recommendation.

PROFESSIONAL EXPERIENCE

Currys, United Kingdom | *Sales Colleague* **Nov 2025 - Present**
- Finished the fiscal year ranked first for sales performance in both store and region and remained in the performance-based Top Squad for eight consecutive periods.
- Diagnose what each customer needs by asking about intended use, current setup and budget, then explain the trade-offs across devices, services and protection options; delivered close to £21,000 against an £8,000 target in one high-performing week.
- Maintain a Care & Repair plan attachment rate above 70% and an 80% customer feedback score; train new colleagues in customer conversations, recommendations and store processes.

Ibrahim Fibres Limited, Pakistan | *Senior Supply Chain Officer* **Aug 2023 - Sep 2025**
- Progressed from Management Trainee Officer to Supply Chain Officer and Senior Supply Chain Officer within two years, working across suppliers, finance, logistics, customs, production and IT colleagues.
- Managed Oracle procure-to-receipt workflows and about 60 international, local shipment and LC cases in peak months, clarifying requirements and resolving documentation and delivery exceptions before they disrupted supply.
- Built a daily Excel dashboard tracking shipment status, lead time, delivery and supplier performance, turning operational data into escalation priorities for cross-functional teams.

ADDITIONAL EXPERIENCE

- **EY AI Case Competition:** worked in a four-person team to design and present an ethically governed AI recommendation concept for a mental-health start-up, addressing accessibility, legal and ethical risks.
- **Splash Community Impact Project:** project-managed a volunteer construction team, allocating work, monitoring progress and supporting safe delivery for a community organisation.
