PROFESSIONAL PROFILE

MSc Business Analytics graduate with two years in global supply-chain operations and a Currys fiscal-year sales ranking of first in both store and region. Uses Python, SQL, Power BI, R and Excel for forecasting, data integration, dashboards and operational reporting. Built a retail forecasting framework with 26.4% lower RMSSE than seasonal naive and led the winning team in a 12-team analytics hackathon. Targeting data, BI, supply-chain and business analysis roles.

CORE SKILLS

Analytics: Python (pandas, scikit-learn, LightGBM), R, SQL, Power BI, DAX, Power Query, Excel and Git
Methods: ETL, data cleaning, data modelling, statistics, forecasting, machine learning, dashboarding and data visualisation
Business: Oracle ERP, procurement, imports, customs, logistics, supplier performance, commercial KPIs, stakeholder management

EDUCATION

Queen's University Belfast, United Kingdom | *MSc Business Analytics* **Sep 2025 - Sep 2026**
Dissertation submitted. Taught-module average at Distinction level; final classification pending.

Lahore School of Economics, Pakistan | *BSc (Hons) Business Administration* **Aug 2019 - Jul 2023**

SELECTED ANALYTICS PROJECTS

- **Explainable Category-Store Demand Forecasting**: Built an explainable M5 retail forecasting framework in Python and Power BI. Across four ordered 28-day backtests and 10,080 forecasts from three models, LightGBM achieved 0.6528 RMSSE, 26.4% below seasonal naive and 10.6% below Holt-Winters; it won 29 of 30 and 19 of 30 series respectively. Used gain-based feature importance and 35 DAX measures to explain drivers, flag exceptions and monitor performance by series and horizon.
- **QBS Data for Good Hackathon**: Winner from 12 teams in June 2026; led a six-member team to analyse 312 Northern Ireland GP practices and build a pressure intelligence system combining demand, clinical burden, deprivation and outcomes to prioritise support and match high pressure practices with nearby potential support partners.
- **Insurance Customer 360**: Coursework project using SQL and R to integrate 4,085 customer records across four linked insurance tables, identify 975 customers holding three policies and create product ownership and channel preference views for cross sell analysis.
- **Craigavon TV Live-Client Analytics**: Initiated and led a live-client project linking 28,115 jobs with 35,994 appointments. Documented 60 data-quality checks, with 59 passing at the latest review, and designed the Power BI data model for workload visibility, appointment planning and backlog prioritisation.

PROFESSIONAL EXPERIENCE

Currys, United Kingdom | *Sales Colleague* **Nov 2025 - Present**
- Finished the fiscal year ranked first for sales performance in both store and region.
- Selected for Currys' performance-based Top Squad across eight consecutive periods; in one high-performing week, delivered close to £21,000 in sales, approximately 2.6 times the £8,000 target.
- Maintain a Care & Repair protection-plan attachment rate above 70% and an 80% customer feedback score through tailored product, service and aftercare recommendations; train new colleagues in store processes and customer conversations.

Ibrahim Fibres Limited, Pakistan | *Senior Supply Chain Officer* **Aug 2023 - Sep 2025**
- Progressed from Management Trainee Officer to Supply Chain Officer and Senior Supply Chain Officer within two years, managing imported and local purchasing for machinery, spare parts, polyester raw materials and coal.
- Controlled Oracle procure-to-receipt from purchase requisition and letters of credit through customs clearance and goods receipt; coordinated about 60 international, local shipment and LC cases in peak months and resolved documentation exceptions before they disrupted supply.
- Built and maintained a daily Excel dashboard tracking shipment status, lead time, delivery and supplier performance, enabling earlier escalation of delays and overdue actions.

ADDITIONAL EXPERIENCE

- **Splash Community Impact Project:** project-managed a volunteer construction team, allocating work, monitoring progress and supporting safe delivery for a community organisation.
- **EY Consulting Case Challenge:** worked in a four-person team to design and present an ethically governed AI recommendation concept for a mental-health start-up, addressing accessibility, legal and ethical risks.
